SCARS

Whether recent or old, resulting from surgery or an accident, scars often bring back painful memories and can be the source of hang-ups. Far beyond their unsightly aspect, scars can remain sensitive and disrupt everyday life by generating pain and functional disorders.

WHY?

The skin heals by producing collagen around the wounded area. If it is not helped, this natural process can degenerate and create a barrier within the skin, hindering exchanges between the cells.

MEDICAL ENDERMOLOGIE®

SCIENTIFICALLY-PROVEN EFFICIENCY

Medical endermologie® is a patented treatment technique delivered by professional Cellu M6 Alliance® Medical devices.

The treatment head gently delivers a mechanical massage on the skin's surface. This treatment enables early, pain-free mobilisation of scars.

The transformation operates from within to stimulate the sleeping cells (fibroblasts and endothelial cells). The production of natural collagen, elastin and hyaluronic acid (+80%*) is reactivated giving thus suppleness and elasticity back to the tissue. Circulatory exchanges are relaunched and the inflammatory state reduced.

This 100% natural and pleasant therapy, provides immediate and lasting relief. Pain fades away, the aspect of the scar improves and mobility is recovered.

IN ADDITION TO
MEDICAL ENDERMOLOGIE®
TREATMENT:

During the healing period of about 6 months, it is important to:

- Massage your scar with a healing cream
(ask your doctor or chemist for advice)
- Protect your scar from U.V. rays with a total sunblock cream,
applying it every hour
- Avoid frictions. Wear soft clothing

ASK YOUR LPG® EXPERT FOR ADVICE!

- 150 SCIENTIFIC STUDIES.
- 90 PUBLICATIONS OF WHICH 39 ON MEDLINE.
- SUPPORT OF THE COSIRE INTERNATIONAL SCIENTIFIC
COMMITTEE SINCE 1999.
